SUBJECT INDEX

Acoustic emission
investigation of acoustic emission in sliding friction and wear of metals, 367
Alcohol fuel
surface spectroscopic study of reaction layer in alcohol-fuelled diesel engines, 137
Aluminium
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337

Bearings
dynamic loading and response of bearings in reciprocating machinery, 81
dynamic properties of flexible journal bearings of infinite width considering oil supply position and pressure, 53
measurement of pressure and deformation in low speed planet gear bearings, 225
Boron nitride
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337

Cavitation
elasticity effects on cavitation in a squeeze film damper undergoing non-centered circular whirl, 69
Ceramics
evaluation of a glass–ceramic coating for machine tool slides, 249
wear processes in the diamond grinding of zirconia ceramics, 353
Coatings
evaluation of a glass–ceramic coating for machine tool slides, 249
general aspects for tribological applications of hard particle coatings, 275
influence of TiN coating on wear of high speed steel at elevated temperature, 123
Composites
friction and wear of polymer composite material, 93
Condition monitoring
tribological failure detection and condition monitoring for diesel engines, 189
Contacts
approximate calculations of the pressure distribution in a scraper ring contact, 29
calculation of the pressure distribution in an arbitrary elastomeric seal contact, 3
elastohydrodynamic point contacts part I: formulation and numerical solution, 301
elastohydrodynamic point contacts part II: influence of surface speeds, surface waviness and load on the contact behaviour, 319
Copper
effect of amplitude on the erosion and corrosion of Cu by 20 kHz ultrasound, 381
Corrosion
effect of amplitude on the erosion and corrosion of Cu by 20 kHz ultrasound, 381

Deformation
measurement of pressure and deformation in low speed planet gear bearings, 225
Diamond
wear processes in the diamond grinding of zirconia ceramics, 353
Diesel engines
a surface spectroscopic study of reaction in alcohol-fuelled diesel engines, 137
tribological failure detection and condition monitoring for diesel engines, 189
Dynamic loading
dynamic loading and response of bearings in reciprocating machinery, 81

Elasticity
elasticity effects on cavitation in a squeeze film damper undergoing non-centered circular whirl, 69
Elastohydrodynamic contacts
elastohydrodynamic point contacts

© Elsevier Sequoia/Printed in The Netherlands

part I: formulation and numerical solution, 301
elastohydrodynamic point contacts part II: influence of surface speeds, surface waviness and load on the contact behaviour, 319
Elastohydrodynamic lubrication
two new formulae to calculate the film thickness in elastohydrodynamic lubrication and an evaluation of Grubin's formula, 357
Elastomers
calculation of the pressure distribution in an arbitrary elastomeric seal contact, 3
theoretical analysis of an unpressurized elastomeric O-ring seal inserted into a rectangular groove, 41
Erosion
effect of amplitude on the erosion and corrosion of Cu by 20 kHz ultrasound, 381

Films
two new formulae to calculate the film thickness in elastohydrodynamic lubrication and an evaluation of Grubin's formula, 357
Fluids
dynamic sealing with magnetic fluids, 261
Friction
friction and wear of polymer composite material, 93
friction measurement by using a scratch test method, 167
investigation of acoustic emission in sliding friction and wear of metals, 367

Greases
tribological properties and lubrication mechanism of molybdenum dialkyldithiocarbamate and Ca compounds in greases, 233
Grinding
wear processes in the diamond grinding of zirconia ceramics, 353

High speed steels
influence of TiN coating on wear of high speed steel at elevated temperature, 123
Hydraulic cylinders
piston rod seal and scraper ring interaction in hydraulic cylinders, 17

Ion implantation
practical applications of ion implantation for tribological modification of surfaces, 113

Journal bearings
dynamic properties of flexible journal bearings of infinite width considering oil supply position and pressure, 53

Lasers
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337
Layers
surface spectroscopic study of reaction layers in alcohol-fuelled diesel engines, 137
Lubricants
relationship between lubricant shear strength and chemical composition of the base oil, 213
Lubrication
lubrication of a rotating ball in normal approach, 203
tribological properties and lubrication mechanism of molybdenum dialkyldithiocarbamate and Ca compounds in greases, 233
two new formulae to calculate the film thickness in elastohydrodynamic lubrication and an evaluation of Grubin's formula, 357

Magnetic fluids
dynamic sealing with magnetic fluids, 261
Metals
predicting the wear rate of metal processing tools by a simulation method, 179
investigation of acoustic emission in sliding friction and wear of metals, 367
Molybdenum
tribological properties and lubrication mechanism of molybdenum dialkyldithiocarbamate and Ca compounds in greases, 233

O-ring seals
theoretical analysis of an unpressurized elastomeric O-ring seal inserted into a rectangular groove, 41
Oils
dynamic properties of flexible journal bearings of infinite width considering oil supply position and pressure, 53
relationship between lubricant shear strength and chemical composition of the base oil, 213

Particles
general aspects for tribological applications of hard particle coatings, 275
Planet gear bearings
measurement of pressure and deformation in low speed planet gear bearings, 225
Polymer composites
friction and wear of polymer composite material, 93
Polymers
friction and wear of polymer composite material, 93

Road preparation
tribological testing of traditional road-grading steels leading to the evolution of new road-preparation concepts, 151

Scraper rings
approximate calculations of the pressure distribution in a scraper ring contact, 29
piston rod seal and scraper ring interaction in hydraulic cylinders, 17
Scratch tests
friction measurement by using a scratch test method, 167
Seals
calculation of the pressure distribution in an arbitrary elastomeric seal contact, 3
dynamic sealing with magnetic fluids, 261
piston rod seal and scraper ring interaction in hydraulic cylinders, 17
theoretical analysis of an unpressurized elastomeric O-ring seal inserted into a rectangular groove, 41
Shear strength
relationship between lubricant shear strength and chemical composition of the base oil, 213
Sliding
investigation of acoustic emission in sliding friction and wear of metals, 367
Spectroscopy
surface spectroscopic study of reaction layers in alcohol-fuelled diesel engines, 137
Squeeze films
elasticity effects on cavitation in a squeeze film damper undergoing non-centered circular whirl, 69
Steels
influence of TiN coating on wear of high speed steel at elevated temperature, 123
tribological testing of traditional road-grading steels leading to the evolution of new road-preparation concepts, 151
Surface profile
information content of surface profiles, surface profile measurements, and profile characterizations, 289
Surfaces
surface spectroscopic study of reaction layers in alcohol-fuelled diesel engines, 137
elastohydrodynamic point contacts part II: influence of surface speeds, surface waviness and load on the contact behaviour, 319
information content of surface profiles, surface profile measurements, and profile characterizations, 289
practical applications of ion implantation for tribological modification of surfaces, 113
wear resistance of hot forging tools surfaced by welding, 103

Titanium
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337
Titanium nitride
influence of TiN coating on wear of high speed steel at elevated temperature, 123
Tools
evaluation of a glass–ceramic coating for machine tool slides, 249

predicting the wear rate of metal processing tools by a simulation method, 179
wear resitance of hot forging tools surfaced by welding, 103
Tribological failure
tribological failure detection and condition monitoring for diesel engines, 189
Tribological testing
tribological testing of traditional road-grading steels leading to the evolution of new road-preparation concepts, 151
Tribology
general aspects for tribological applications of hard particle coatings, 275
tribological properties and lubrication mechanism of molybdenum dialkyldithiocarbamate and Ca compounds in greases, 233

Ultrasound
effect of amplitude on the erosion and corrosion of Cu by 20 kHz ultrasound, 381

Vanadium
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337

Wear
friction and wear of polymer composite material, 93
influence of TiN coating on wear of high speed steel at elevated temperature, 123
investigation of acoustic emission in sliding friction and wear of metals, 367
laser cladding of Ti–6Al–4V with BN for improved wear performance, 337
predicting the wear rate of metal processing tools by a simulation method, 179
wear processes in the diamond grinding of zirconia ceramics, 353
wear resistance of hot forging tools surfaced by welding, 103
Welding
wear resistance of hot forging tools surfaced by welding, 103

Zirconia
wear processes in the diamond grinding of zirconia ceramics, 353
